

EPIDAURE panel

Replicate the feel of large cinema experience

Sound quality system for a real state of total immersion into action. **EPIDAURE** panels give a temporal and spatial coherence to the sound in a room and alleviate most acoustical annoyance.

European Exclusive Patent

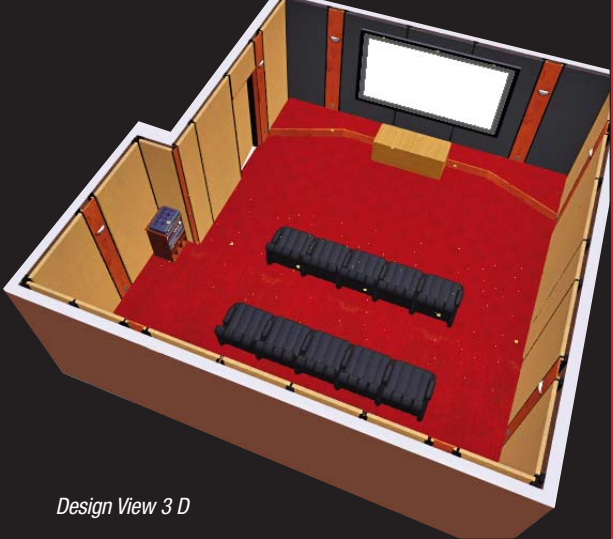

HOCINEMA
l'expertise acoustique

Experiment **LARGE** cinema feeling

Benefits of the EPIDAURE acoustic panel :

- Room resonant modes control by panel damping effect tuning
- Room reverberation control
- Enhance perception of sound sources
- Detailed accuracy of dialogs
- Precise reproduction of sound effects
- Feel of well being
- Sound quality booster
- Customised and aesthetic integration of acoustic

Design View 3 D

All in 1 solution
For a total sound quality

HOCINEMA

Acoustic efficiency :

Create an utmost sound quality to give the real feel of large cinema experience

Aesthetic and practical :

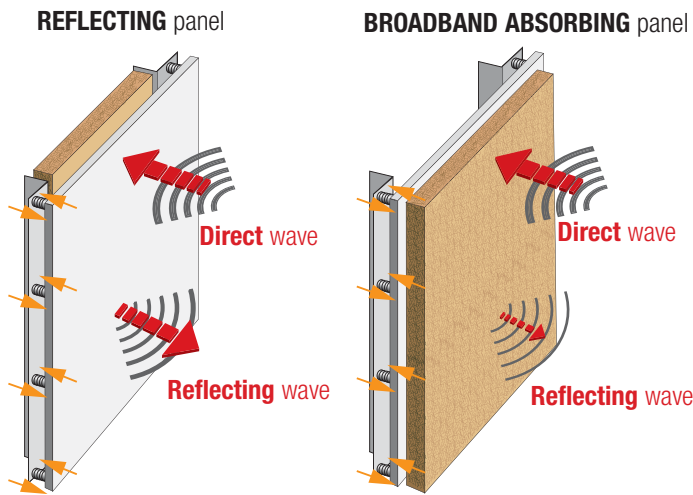

Completely modular setting of panel, make all wiring and speakers invisible. Customised final look with all kind of sound transparent fabric.

Comfort and insulation :

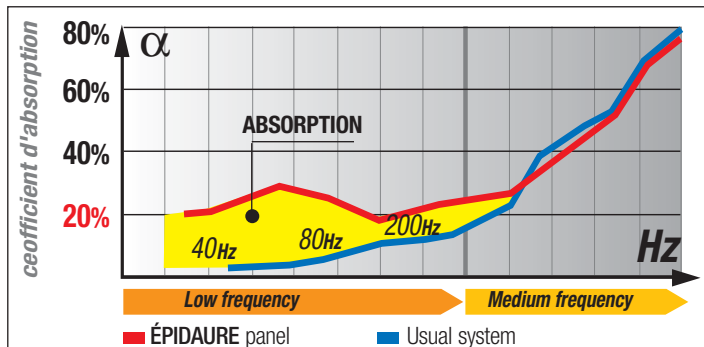

Thanks to 4 inches thickness EPIDAURE panel system increase room sound and thermal insulation that reduce inconvenience in surrounding rooms and make possible to have a movie late in the evening.

Perfect sound quality and tailor made acoustic design with **EPIDAURE** acoustic panel system thanks to innovative patent that allow to tune panel damping effect individually adjusted to room resonant modes.

BF absorbent / MF and HF

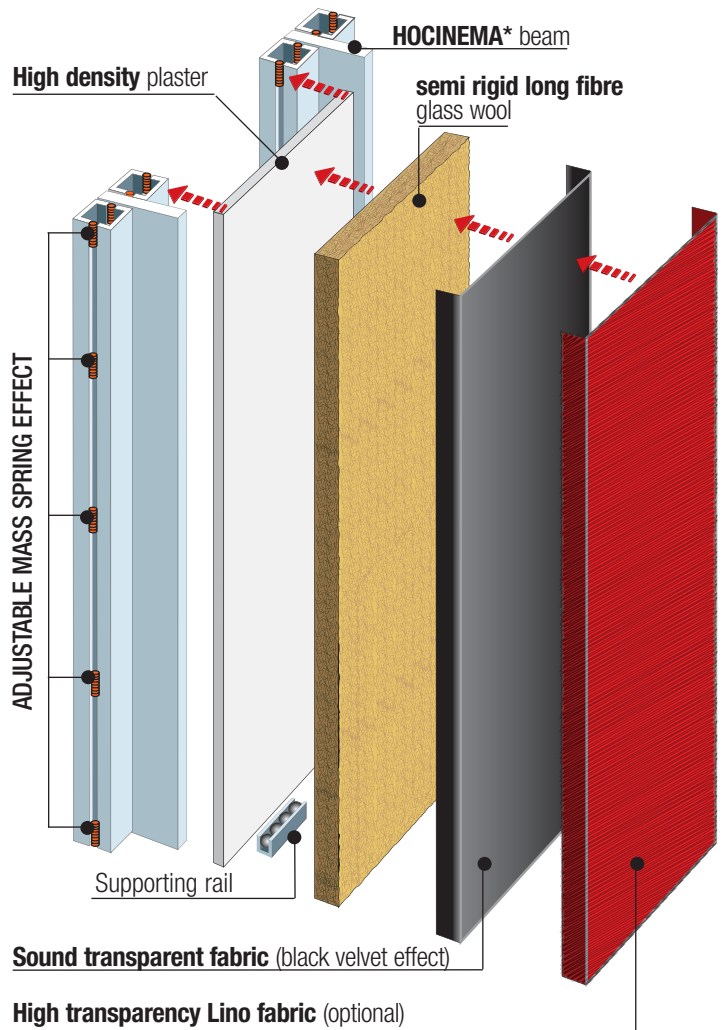

Fitted with MF and HF reflecting or absorbing function, **EPIDAURE panel keeps absorbing low frequency to the exact room resonant mode**. These high performances make sound field as homogenous as possible what ever is the room size or architecture configuration.

EPIDAURE low frequency resonance absorption is the **only system that is only 4 inches thick with a high absorption coefficient from 30 Hz**. EPIDAURE system is by far more efficient than other usual system. By decreasing low frequency reverberation time it gives more detailed perception of sound sources.

EPIDAURE Panel - HOCINEMA system *

A complete range of colour fabric to cover the acoustic panels and a lot of wooden panel to be integrated between acoustic panels.
