

# “ON WALL” Acoustical Panel

When interior decoration rhymes  
with acoustic solution.

*When you want to get rid of acoustic disturbances in your living room just hang a ZENITH with our standard fabric or your own choice of artwork or photography printed on fabric to fit your own taste ! An easy and effective way to address acoustic treatment saving the look of your room !*

Classic" or "Customized",  
Zenith will become your partner in decoration.

**HOCINEMA**  
l'expertise *acoustique*

The new **ZENITH acoustic panel** is for the Home cinema or music enthusiast who wants to maximize his listening conditions without drastic interior modifications.

Strategically positioned on walls ZENITH will also enhance your audio equipment's sonic performances.

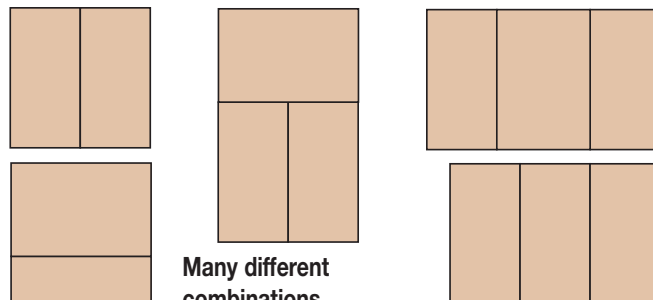

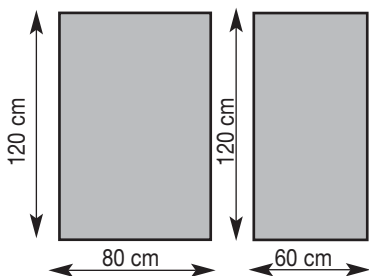

**Absorption characteristics depend on the sound frequency;** ZENITH is the only panel able to address a broad frequency range from 16KHz down to 80 Hz within less than 3 inches thickness (70mm). Absorbing low frequency resonance will give a detailed accuracy of dialogue. ZENITH will fix flutter echo as well as buzzing effects.

**ZENITH can be widely used around the home :** Ideal in the Home cinema area, dining area or the piano/music corner in your living room, etc... It is also suited and recommended for all commercial and professional rooms where you need to have acoustic comfort such as meeting rooms, libraries, waiting rooms, launges, museums etc....

For private as well as professional use, ZENITH is versatile, with a choice of different frames and fabric screens; it can be customized with your own colour, size or artwork.

Wall hanged like a picture frame, vertically, horizontally, 2 , 3 or more depending on the needed correction, side by side or any other configuration based on the 2 standard sizes . For any other size or shape, please ask for a quotation.
